in December 2008?*

COMM 10 Training Workshops

What Tank Owners and Operators Need to Know

What is COMM 10?

COMM 10 is a state-wide flammable, combustible and hazardous liquids code. It is a combination of prescriptive and performance based requirements. **The code will change in February 2009.** The rule revision includes a more user friendly format, updated national standards, regulatory modifications to address changes in technology and trends, language modifications to enhance rule application and intent as well as federal energy bill requirements.

About the Speaker—Sheldon Schall

Sheldon Schall is Chief of the Storage Tank Regulation Section at the WI Dept. of Commerce. Sheldon has been involved with fire safety and environmental protection since 1974 as a fire chief, hazardous material emergency response instructor, consultant, and regulatory official. Mr. Schall oversees the storage tank administrative code technical requirements, the Commerce petroleum product inspection program, the storage tank inspection program, and contractor certification.
